Seepage & Leakage Coverage: What is it?

Seepage and leakage coverage provides coverage for damage from continual accidental seeps or leaks that occur for a period of 14 days or more from water or steam within plumbing systems, heating systems, AC systems and household appliances. This endorsement helps cover the cost of tearing out and replacing any part of a building necessary to repair the system or appliance where the seep or leak began. A slow, continuous water leak may go undetected until it causes severe damage and we want to ensure you have the coverage needed in the event of a loss.
